Java / Web Developer - 24 Media

24 Media is Greece's largest digital publishing group, managing over 20 premium content brands across different platforms, such as web and mobile, with a total audience of more than 6 million Unique Browsers per month. Examples of brands are sport24.gr, news247.gr, contra.gr, oneman.gr, techgear.gr etc. For more information please check out www.24media.gr

We have a vacancy for a motivated Java / Web Developer to be part of our Development Team with plenty of opportunities for personal development and learning in an enjoyable and friendly working environment. The Team is responsible for the whole lifecycle of our content for provision to all platforms, from technical analysis and specification to development, testing, deployment and support.

Required Skills and Experience:

- University Degree in Computer Science or other relevant field
- At least 3 years (post-degree) of working experience in S/W design & development similar to the expertise required

In particular we look for expertise and talent in the following:

- Java: Excellent programming skills with Spring Framework, JPA, JSP / JSTL
- Web: Excellent knowledge of JavaScript, MVC framework / HTML / CSS and relevant technologies
- Experience in Linux environment.
- Administration skills (Ubuntu Server, Apache, Tomcat, MySQL) will be highly appreciated

Personal Characteristics sought after:

- Ability to work as part of a team
- Self-motivated and methodical, with attention to detail
- Strength under pressure and strictness with deadlines

Please submit your cover letter and CV to cv@24media.gr quoting Ref. JW-D
Submission Deadline 18/3
